"Digital Humanities and Ontologies" training for students

This course explores the dynamic intersection of technology, humanities, and social sciences, offering a multidisciplinary perspective that redefines conventional practices and opens new horizons for academic disciplines.

During this course, you'll be able to apply your acquired knowledge in full-day hands-on sessions using Protégé, the industry-leading ontology editor. Here, you'll personally craft distinct terminologies and ontologies, further enhancing your expertise in the field of digital humanities.

Christophe Roche

Maria Papadopoulou

The lecturers/trainers are Christophe Roche (<http://christophe-roche.fr/>) and Maria Papadopoulou (<http://o4dh.com/maria-papadopoulou>). Both lecturers are members of TALOS-AI4SSH, ERA Chair in Artificial Intelligence for Humanities and Social Sciences (<https://talos-ai4ssh.uoc.gr/>).
